Location of Application

1. The location of the subject application has changed. The subject application is now located in Group 1650, Art Unit 1655, and has been assigned to Primary Examiner Bradley L. Sisson.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 86-105, drawn to method of obtaining a plurality of biallelic markers.

Group II, claim(s) 106-114, drawn to a set of biallelic markers.

Group III, claim(s) 115, drawn to a map comprising an ordered array of at least 20,000 biallelic markers.

Group IV, claim(s) 116 and 117, drawn to a method of identifying one or more biallelic markers associated with a detectable trait.

Group V, claim(s) 118, drawn to a method of determining whether an individual is at risk of developing a detectable trait or suffers from a detectable trait associated with said trait.

Group VI, claim(s) 119, drawn to method of using a drug.

Group VII, claim(s) 120, drawn to a method of selecting an individual for inclusion in a clinical trial of a drug.

Group VIII, claim(s) 121, drawn to a method of identifying a gene associated with a detectable trait.

Art Unit: 1655

3. The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The aspect of biallelic markers was known in the art prior to the time applicant filed the instant application. Evidence of such prior knowledge is found in the prior art filed in this case. The claims have sufficient breadth of scope so to encompass virtually any biallelic marker and as such, the claims are not linked by a special technical feature and therefore lack unity of invention.

4. In the even that applicant elects the invention of Group II, the following election of species will apply.

5. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- a) The biallelic marker of claims 107 and 108;
- b) The biallelic marker of claim 109;
- c) The biallelic marker of claim 110;
- d) The biallelic marker of claim 111;
- e) The biallelic marker of claim 112;
- f) the biallelic marker of claim 113; and
- g) The biallelic marker of claim 114.

Art Unit: 1655

6. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

7. The following claim(s) are generic: the biallelic marker of claim 106.

8. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The claims encompass virtually any biallelic marker which, as shown in prior art of record, were known prior to the filing of the subject application.

Accordingly, the claims are not linked by a special technical feature.

Sequence Rules Compliance

9. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent

Application/Control Number: 09/463,075
